We again call the especial attention of our customers to the rule of the trade that all orders growing crops and stock not actually in hand are accepted subject to crop failures, shortages, or other causes beyond control, and the right to advance prices without notice.

The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long strong stems their handsome Chrysanthemum-like flowers, which, under ordinary cultivation, averages 5 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September, and filling in the gap between the general run of Asters and Chrysanthemums. Dreer's "Peerless Pink" Aster

This grand Aster may be briefly described as a glorified late branching shell-pink or Mary Semple. It has the same strong, sturdy habit of growth; comes into bloom a little earlier, bears freely almost globular flowers, rarely under 4 inches across and frequently over 5 inches. The color is rich shell-pink, similar in shade but more decided than the late branching. The centre petals are prettily incurved, while the wide outer petals reflex, making a most artistic and finely finished flower, and stands cut longer than any other. 50 cts. per trade pkt.; \$2.50 per oz.

DREER'S SELECT DAHLIAS

We have again this season greatly extended our cultures of Dahlias and we offer not only the well known standard sorts, but also an exceptionally fine list of novelties, both of American and European origin, among them a number of valuable novelties which are offered exclusively by us this season, all of which will be supplied in dormant field roots or in strong divisions of proper planting size excepting the new varieties: Pride of San Francisco, Little Jewel, Mr. C. H. Dresselhuus, The Set of Six New Dreer Dahlias and all of the varieties listed on pages 30 to 32, under the heading of "Varieties of Recent Introduction and of Special Merit," these will be supplied only in strong growing or green plants from three inch pots which will be ready for delivery about May 15th.

Dahlias of Recent Introduction and Varieties of Special Merit

The varieties here offered consist of new American and foreign introductions, also including a few older sorts which are still scarce and which rank in quality with some of the best of recent introduction.

NEW CALIFORNIA DECORATIVE DAHLIA

"Pride of San Francisco"

Of the many varieties of Dahlias which we have catalogued in the past, there has been none over which we felt so enthusiastic as we do over this, which we are now offering for the first time.

A strong vigorous grower of compact uniform habit, about four feet high and requires no staking or support. This uniform habit of growth, freedom of flowering and the erect position in which its flowers are held together with its beautiful color make it pre-eminently of special value for garden decoration; in fact, for massing in a bed the same as you would Cannas there is no other variety that will lend itself so perfectly for this purpose.

The flowers are borne on stout, stiff stems of sufficient length to make them valuable for cutting and under ordinary cultivation, without disbudding, will develop blooms from six to seven inches in diameter which are of most perfect decorative shape.

The petals are of a most pleasing shade of salmon-pink, with soft rose suffusion towards the tips of the outer petals and golden base, the color effect as a whole being a pleasing brilliant golden salmon-pink, which is just as effective in artificial as under daylight. Plants **\$2.00** each; **\$20.00** per dozen; **\$150.00** per 100.

New Dahlia—Pride of San Francisco

New Dahlia—
Mr. C. H. Dresselhuus

A WONDERFUL COMMERCIAL DAHLIA FOR CUT FLOWERS

"Mr. C. H. Dresselhuus"

For many years the variety Delice has been a favorite cut-flower and while beautiful, is not free flowering. In this we have a similar but even more pleasing color. It is a soft rose-pink with white suffusion towards the tips, and what is most important, one of the most prolific bloomers in our fields. The flowers are of medium size; just right for cutting and are splendidly supported on very long stiff stems. Undoubtedly one of the best pinks for cutting yet produced.

Plants **35 cts.** each; **\$3.50** per doz.; **\$25.00** per 100.

NOTE—The varieties offered on this page can only be supplied in green plants, ready for delivery about May 15.

Dahlias of Recent Introduction and Varieties of Special Merit

NEW DECORATIVE POMPON DAHLIA

"Little Jewel" (Juweeltje)

Every visitor to our trial grounds during the past summer after looking over the many giant flowered sorts was pleased to have the opportunity to see this dainty little gem, a most perfect pompon decorative which is in a class by itself and for which we predict great popularity both for the garden and as a cut flower for table decoration, a vase of a dozen flowers interspersed with a few fern fronds will outclass any other Dahlia for this purpose.

It is of graceful habit of growth, extremely free flowering, the flowers are of the most perfect decorative type in miniature and are of a beautiful peach blossom pink.

Plants **75 cts.** each; **\$7.50** per dozen; **\$60.00** per 100.

Six New Dreer Dahlias

Seedlings of our own raising which have been thoroughly tested for three seasons and which we can recommend. All of them are varieties that have been singled out and admired by visitors to our fields during the past two seasons.

Color Symphony. (Decorative.) Flowers of good size composed of long flat petals forming a perfect flower of artistic coloring. The ground color is empire-yellow, each petal marked with a more or less irregular band of old-rose.

Fascinating. (Hybrid Cactus.) A particularly well-shaped flower of large size and of good depth and of an exceptionally pleasing color, a glistening mallow-pink with silvery suffusion, produced profusely, in good condition to the end of the season.

Luminous. (Decorative.) Very full, perfect flowers of a deep purplish garnet with luminous pomegranate red shadings, strong wiry stems.

Picture. (Decorative.) Flowers of perfect decorative form of good size on long stiff stems; color, pale lemon-yellow, with faint suffusion of capucine-buff.

Tyrian Rose (Decorative.) Very large, perfect flowers of a tyrian-rose color shading lighter towards the edges. Free and early with good stems.

Price—Any of the above 6 varieties in plants, ready May 15th, **\$2.00** each; the set of 6 varieties for **\$10.00**.

Ambassador (Hybrid Cactus). The sensational Dahlia since its introduction in 1921 when it won the first prize at the San Francisco show for the best and most artistic variety exhibited. Its color is a soft yellow at the centre, with salmon-amber and pink shadings, gradually deepening towards the tips. The flowers are of largest size and set just right on perfect stems. Plants **\$3.50** each; **\$35.00** per doz.

Amun Ra or The Sun God (Giant Decorative). One of the most sensational of the new Dahlias, and while a giant in size is without coarseness, it being perfect in shape. The outer petals are of gorgeous copper and orange tones shading to gold and amber, deepening in the centre to a dark reddish brown, the effect as a whole being that of a gorgeous sunset. The stems are stout and hold the immense flowers well above the strong vigorous plants; the flowers keep for days when cut and last a wonderfully long time on the plant. Plants **\$2.50** each; **\$25.00** per doz.

Augusta R. Johnson (Peony). Large flower on good stems usually of Peony form but sometimes developing flowers of decorative type, color, soft primrose-yellow, outer petals lightly suffused orange-pink. Plants, **\$1.50** each; **\$15.00** per doz.

Pompon Dahlia Little Jewel

The prices here quoted are for strong 2- to 3-eye, fresh-cut divisions, of which delivery can be made at any time before April 1st, after which date only well-established growing plants from 3-inch pots can be furnished.

The increasing demand for started Cannas has induced us to specialize in these, and we are preparing a large stock of 3-inch pot-plants for delivery after April 1st.

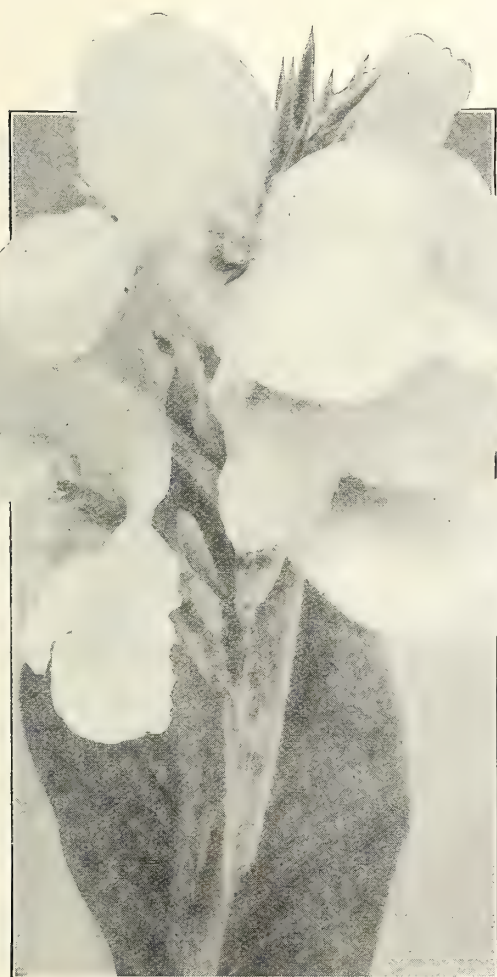

The average florist, who prepares for the demand for Easter plants, will find this well-established stock, of which we can make delivery immediately after Easter, a profitable investment. The plants will be in proper condition to shift at once into 4- or 5-inch pots, thus making ideal plants for retailing at bedding-out time.

PRICES ON DORMANT AND POT-PLANTS OF CANNAS

The prices here quoted are for dormant 2- to 3-eye divisions. The price for well-established 3-inch pot-plants will be as follows: All varieties priced at \$8.00 per 100 or less in dormant roots will be supplied in pot-plants at the uniform rate of \$1.25 per doz.; \$8.00 per 100; \$70.00 per 1000; but on all varieties listed above \$8.00 per 100, the price of both dormant roots and pot-plants will be the same.

The Glory Fern (*Adiantum Farleyense Gloriosa*)

Cyrtomium Rochfordianum Compactum

DREER'S FINE FERNS

Varieties of Special Merit. General Collection offered on page 47.

Adiantum Cuneatum "Monterey"

We take pleasure in calling the attention of growers of cut fern fronds to this new variety which we have had under observation for some time and which we believe will prove superior to and displace all varieties of this type on account of its vigorous, rapid growth and the exceptionally long-stemmed fronds which it produces. Like the variety California, it originated on the Pacific coast and is similar to it in the formation of the individual pinnæ, but longer in the frond, a rich lively green in color and of excellent keeping quality when cut.

We offer strong 2¼-inch pots, \$3.50 per doz.; \$25.00 per 100; \$225.00 per 1000. 500 or more supplied at the thousand rates.

Adiantum Farleyense Gloriosum

The Glory Fern

This splendid Fern which so closely resembles *Adiantum Farleyense* in appearance and which does not require the special skill and care in growing that is necessary to produce good plants of *A. Farleyense*, has quickly made a place for itself, not only on account of the fact that it can be produced for little over half that of growing *Farleyense*, but also because either in a cut state or as plants used in decorative work, it will outlast the old variety ten to one, making it an available subject where *Farleyense* can not be used at all.

We are now booking orders for June delivery. Good 2¼-inch pots, \$12.00 per 100; \$110.00 per 1000.

Seedling Plants of *Polypodium Mandaianum*

For several years we have been growing seedlings from spores which we succeeded in raising on a plant of *Mandaianum*, these seedlings while they do not have the fringed or lacinated pinnæ of the type are more or less curled and wavy on the edges and are entirely distinct from *Polypodium Aureum*.

Besides this graceful formation of the fronds, it naturally makes a bushy, well-shaped plant, either in a four or six-inch pot, or even in an eight, ten or twelve-inch tub, meeting with a ready sale in all sizes.

Being of rapid growth, it is a profitable plant to grow. As a house plant it gives universal satisfaction; in this it is unequaled by any other fern, not even excepting the popular Holly Fern.

2¼-inch pots, \$1.50 per doz.; \$10.00 per 100.

Mixed Ferns for Dishes

We have at all times a good supply of these. 2¼-inch pots, \$6.00 per 100; \$50.00 per 1000.

Thunbergia

Vitex Macrophylla

In general habit similar to **V. Angus Castus**, but much stronger in all its parts, the foliage being larger while the trusses of lavender-blue flowers are fully double the size. DREER'S SELECT ROSES

Strong Two-Year Old Stock for Your Retail Trade

The Roses here offered are all field grown plants, the greater part of them have been specially grown for us by Howard & Smith at their San Fernando Nursery, California, and the plants are equal to the best Roses produced anywhere in the Rose growing world today.

These plants are all potted during December and January, stored in cold houses and cold frames, so that they break away naturally in spring, making this the best possible stock for selling to the retail customer.

The prices noted are for strong plants in 5 and 6-inch pots (according to the growth of the variety) for delivery during April, May and June, and while we will make shipments earlier if requested, we prefer to book orders for those months only.

Novelties and Varieties of Special Merit in Hybrid-Tea Roses

Miss Lolita Armour

Diadem (McGredy, 1922). Deep crimson, heavily overlaid with orange crimson suffused deep salmon and coppery yellow. Large full flower of perfect form and sweetly scented. \$2.00 each.

Edel (McGredy, 1919). A splendid white bedding variety, an enormous bold, stately, well-built flower of great depth, quality and finish. A fine grower. Very free-flowering, delightfully scented. \$1.00 each.

E. P. H. Kingma (Verschuren, 1919). A sport from the popular Daily Mail Rose "Mme. Edouard Herriot" in color a wonderful rich, glowing, deep, orange-shaded apricot, the flowers are beautiful in bud form, it blooms profusely and continuously. \$1.00 each.

Eldorado or Land of Gold (Howard & Smith, 1922). An exact counterpart of Miss Lolita Armour, in the large-sized flowers of distinct formation, vigorous growth and free-flowering habit and fragrance, but in color it is of that golden yellow peculiar to the climbing Rose Marechal Neil. \$1.50 each.

Etienne Rebeillard (Pernet-Ducher, 1923). A pleasing lively shade of flesh-pink with golden suffusion, flowers of globular form and sweetly scented. \$2.00 each.

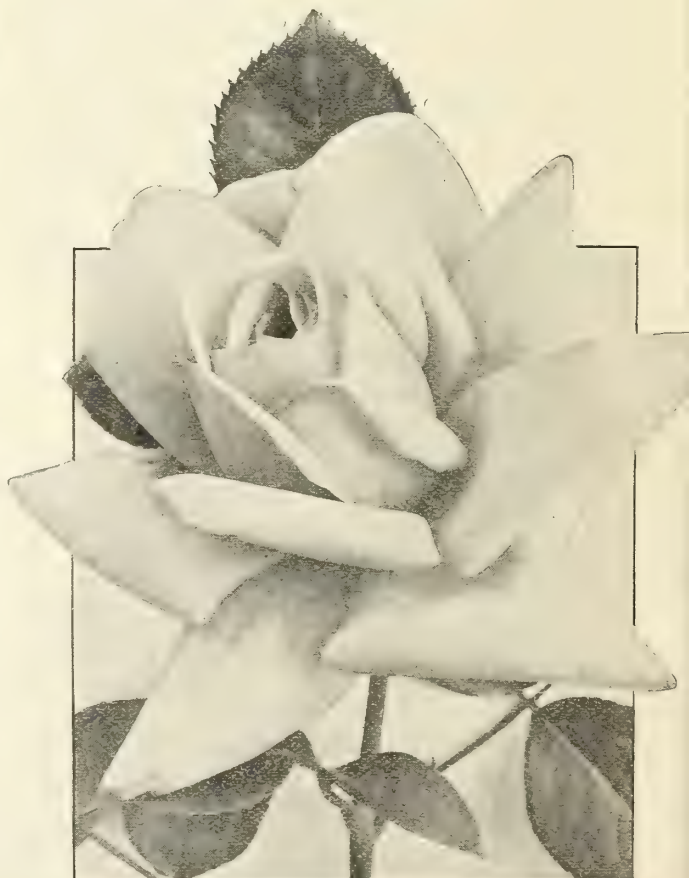

Los Angeles. This grand flame-pink variety is too well known to require description. Our stock this season is very extensive and the plants are in prime condition. 75 cts. each.

Lulu (Walter Easlea, 1919). A dainty and distinct Rose, with exceptionally long buds which in outline, but not in size, remind one of the miniature or Fairy Rose, Mme. Cecile Brunner, while in color it is similar to Mme. Edouard Herriot. Orange-red shaded with salmon-pink. Beautiful in bud form. \$1.00 each.

Mabel Morse (McGredy, 1921). Free ideal habit; large, full, well formed flowers, freely and continuously produced, color clear, bright, golden-yellow, without shading; free from mildew and sweetly scented. The introducer claims it to be the best yellow yet raised. \$2.00 each.

Miss Lolita Armour (Howard & Smith, 1920).

The coloring is a combination of tints difficult to describe, and is absolutely distinct from all other varieties. The flowers are of large size, full double, with petals of great substance and delightfully fragrant. As the flowers expand they develop to a deep, coral-red with a golden, coppery-red suffusion, the base of the petals is a rich golden-yellow with coppery-red sheen. The plant is a strong, vigorous grower, and very free-flowering. \$1.00 each.

Hybrid-Tea Rose Los Angeles

Novelties and Varieties of Special Merit in Hybrid-Tea Roses

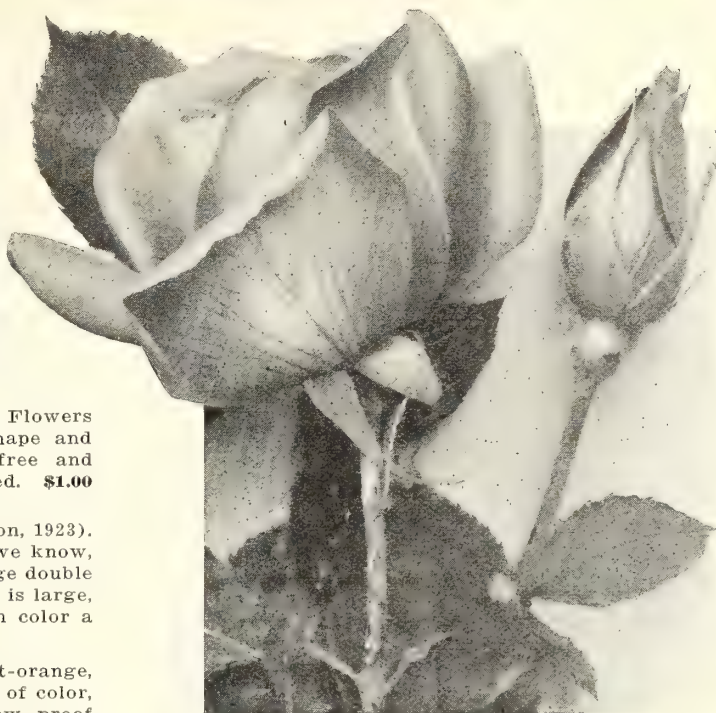

Mrs. Charles Lamplough. A most refined and pleasing soft tone of light lemon, flowers of wonderful size, depth and substance; very sweet-scented. A vigorous grower. **\$1.00** each.

Mrs. Henry Morse. Mr. McGredy describes this as follows: "Its merits are so great that it stands quite by itself, the most wonderful coloring, perfect shape and form, together with its marvelous freedom of blooming and habit of growth, a combination ideal of perfection in a Rose." Rising from a ground work of soft flesh-cream, the whole flower has a clear sheen of bright rose deeply impregnated and washed vermillion, with clear vermillion veining on the petals, which are really wonderful for depth, size and substance; the largest and most pointed of all Roses of its type; sweetly scented. **\$2.00** each.

Mrs. H. R. Darlington (McGredy, 1920). Flowers creamy yellow, very large, faultless in shape and form, with very large petals. Growth free and upright, very free-flowering; highly scented. **\$1.00** each.

Mrs. H. S. Prentiss Nichols (Robert Scott & Son, 1923). One of the strongest growing hybrid-teas we know, it is of erect sturdy habit, producing its large double well-formed flowers very freely, the foliage is large, dark green and of a leathery substance, in color a brilliant deep pink. **\$1.50** each.

Mrs. Redford (McGredy, 1919). Bright apricot-orange, one of the most striking of this lovely tone of color, an upright grower with holly-like mildew proof foliage. The flowers are solidly built, perfect in form, very free-blooming and sweetly scented. **\$1.50** each.

Hybrid-Tea Rose, Padre

Padre (B. R. Cant, 1920). Most attractive and novel in coloring, with long petals of a coppery scarlet flushed with yellow at the base. Produced on long shoots. Growth strong and exceedingly free-flowering. **\$1.00** each.

President Cherioux (Pernet-Ducher, 1922). One of the most beautiful of this season's varieties of Mr. Pernet-Ducher, a beautiful shade of prawn-red and salmon-pink shaded with yellow, large, full, splendidly formed, globular flowers, a strong, vigorous grower and very free-flowering. **\$2.25** each.

Souvenir de Claudius Pernet. We are sold out of two-year-old plants of this novelty, but can supply plants of last July's budding, which have developed one strong cane with splendid root system at **\$1.00** each.

Souvenir de Georges Pernet (Pernet-Ducher, 1921). This splendid Rose is one of the most promising bedding Roses offered in recent years. In vigor of growth and freedom of bloom it even surpasses Claudius Pernet; its flowers are large, of globular form, color Orient-red shading to a cochineal-carmine at the end of the petals, the whole being suffused with a golden sheen. **\$1.00** each.

The Queen Alexandra. A brilliant flower of intense vermillion, deeply shaded old gold on reverse of petals, which spring from a pure orange base, one of the most remarkable color combinations seen in Roses. The flowers are quite full and when half blown are bewildering in their beauty, delightfully sweet-scented. **\$1.50** each.

William F. Dreer. A very beautiful Rose of the same parentage as Los Angeles, and which, for delicacy of coloring is not comparable to any other variety. The flowers which are similar in shape to Los Angeles, and like that variety, beautiful in all stages of development, are at their best in half-expanded flower. These, in expanding, are of a soft, silvery shell-pink, the base of the petals of a rich golden-yellow which, at certain stages of development, gives a golden suffusion to the entire flower. This Rose is making a good record in all parts of the country and is becoming a popular bedding variety. **\$1.00** each.

New Gaillardia
Portola**New Gaillardia, Portola**

We consider this novelty, which originated in California, one of the most valuable perennial introductions in many years. The plant, unlike the usual type, which is inclined to be somewhat straggly, is of strong, vigorous, upright habit of growth, 2½ to 3 feet high, with heavy, leathery, glaucous foliage; the long flower stems straight and strong, hold the massive flowers erect. These are of extraordinary size, from 3½ to 4 inches and over in diameter; the petals very broad, overlapping, of great substance, and spread out flat, forming a very symmetrical flower. In color, a brilliant, rich coppery-scarlet, each petal heavily tipped or margined with golden yellow—altogether a wonderful improvement over existing sorts, and valuable alike as a flower for the garden and for cutting.

Good young plants from 2¼-inch pots that will bloom freely this season, ready April 1st. **\$3.50** per doz.; **\$25.00** per 100; **\$200.00** per 1000.

Clematis Montana Perfecta

Of stronger growth than any other Clematis and succeeds under the most adverse conditions, and is perfectly hardy. Its flowers, which resemble the Anemone or Windflower, are snow-white 1½ to 2 inches in diameter, and frequently begin to expand as early as the last week in April, continuing well through May, and are produced in such masses as to completely hide the plant. It is the best of the very early spring flowering climbers, of which there are but few. 75 cts. each; \$7.50 per doz.

Wheel Hoes, Cultivators and Seeders

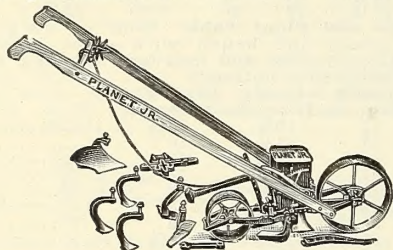

Much of the tedious, back-breaking seeding, weeding and hoeing are eliminated by the use of adjustable wheel tools. Being light and simple in construction they are practical tools for women and children. Market gardeners use them making possible accurate sowing and thorough cultivation in rows too narrow for horse tools.

Send for a Planet Jr. Catalogue. It is possible to list only a few of these tools here since the line includes a very complete assortment of hand tools and horse tools, both for one horse and two horses.

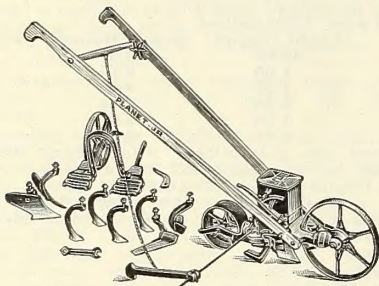

No. 3 Planet Jr. Hill and Drill Seeder

A popular size at a moderate price. The size used by growers excepting the very largest market gardeners.....**\$21 00**

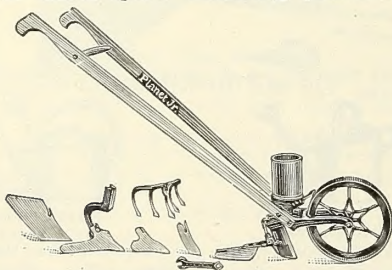

No. 4 Planet Jr. Combined Hill and Drill Seeder and Single Wheel Hoe

The small grower should select one of the combined machines. The drill attachment will not be used as often as the hoeing and cultivating tools, but will be a source of much saving. This machine is a special favorite. There are probably more of them in use in the world than any other seeder made. As a Hill and Drill Seeder it opens the furrow, deposits the seed, covers it and rolls it, either in drills or hills. Holds $2\frac{1}{2}$ quarts..... **21 50**

No. 25 Planet Jr. Combined Hill and Drill Seeder and Double Wheel Hoe

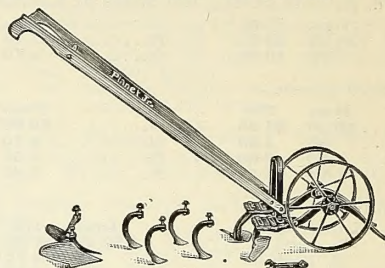

This machine as a seeder is practically the same as No. 4; sows in drills or drops in hills 4, 6, 8, 12 or 24 inches apart. Holds $2\frac{1}{2}$ quarts.... **26 00**

No. 31 Planet Jr. Combined Drill Seeder and Single Wheel Hoe

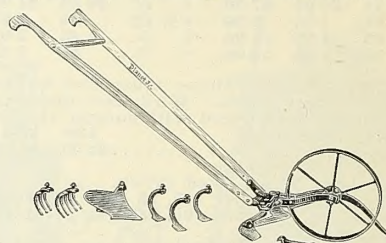

This machine is thoroughly well made and offered at a price that makes it pay the very small gardener. Holds 1 quart..... **14 50**

No. 35. A seeder Attachment which can be attached to the Planet Jr. Wheel Hoes, a tool for the home gardener..... **7 75**

No. 12 Planet Jr. Double and Single Wheel Hoe

The arch is high enough to straddle a row until plants are 20 inches high; this insures close work. It can be altered into an admirable single wheel hoe for working between rows.... **13 00**

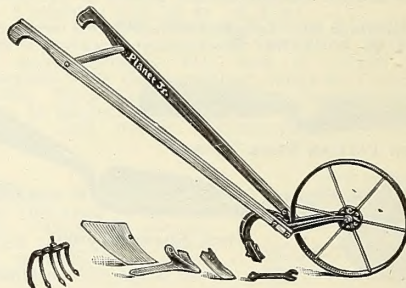

No. 16 Planet Jr. Single Wheel Hoe

Designed to do all work required in the small garden, plowing, cultivating, hoeing and raking. It is very light, and can therefore be easily carried about..... **10 75**

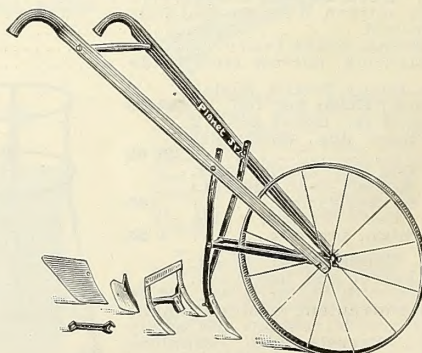

No. 17 Single Wheel Hoe

Identical with No. 16, excepting that the two rakes and leaf guard are not supplied..... **9 00**

No. 19 Planet Jr. Single Wheel Hoe

Designed to do all the work that No. 16 will do, but is of cheaper construction..... **7 00**

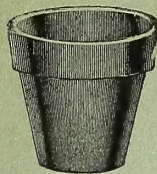

No. 119 Cultivator and Plow

Where soil has not been thoroughly prepared, the high wheel makes an easy running tool... **5 80**
